Notice of Fee Increase on October 1, 2004

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2004, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" because some fees will increase effective October 1, 2004. See Revision of Patent Fees for Fiscal Year 2005; Final Rule, 69 Fed. Reg. 52604, 52606 (May 10, 2004).

The current fee schedule is accessible from WEB site (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2004 (or mailed with a certificate of mailing on or after October 1, 2004), the issue fee paid should be the fee that is required at the time the fee is paid. See Manual of Patent Examining Procedure (MPEP), Section 1306 (Eighth Edition, Rev. 2, May 2004). If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See MPEP Section 1308.01.

Effective October 1, 2004, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
 - By a small entity (Sec. 1.27(a))..... \$685.00
 - By other than a small entity..... \$1,370.00
- (b) Issue fee for issuing a design patent:
 - By a small entity (Sec. 1.27(a))..... \$245.00
 - By other than a small entity..... \$490.00
- (c) Issue fee for issuing a plant patent:
 - By a small entity (Sec. 1.27(a))..... \$330.00
 - By other than a small entity..... \$660.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

1. This communication is in response to amendment filed 12/19/2003.

Response to Amendment

2. Claim 52 has been amended. Claims 52-53 and 61-62 are pending.

Response to Arguments

3. Applicant's arguments see pp 4 and 5, filed 12/19/03, with respect to rejection of claims 52-53 and 61-62 have been fully considered and are persuasive. Accordingly the rejection of claims has been withdrawn rendering the aforementioned claims allowable.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The claimed invention pertain to a phone card revaluing method for altering the value of user's phone card by way of an electronic commerce terminal system.

The following prior art references have been deemed most relevant to the allowed claim(s):

a. Molano et al. (US Pat. 6,330,978) discloses a method, which loads and unloads data representative of cash value to and from an integrated circuit bearing card, which card may be used by a card bearer to obtain goods, services or other items of value. The system of the present invention enables the card bearer to debit the cash value loaded on to the card from a bank account associated with the card or to debit or charge the value to other accounts associated with different cards.

b. Renner et al. (US Pat. 6,223,984) discloses a an intelligent card reader which replaces a plurality of cards and remain compatible with their existing interfaces by emulating a magnetic card reader, a Wiegand effect reader, or a bar code reader. The card reader accepts smart cards having different functions and/or interfacing techniques so that different types of smart cards can be used in the same reader.

The Molano and Renner references as discussed above as the Closest Prior art of record fails to teach or suggest a method of phone card revaluing which alters the value of an user's phone card by way of an electronic commerce terminal system having the unique feature of communicating transaction data retrieved from a phone card detected at an electronic commerce terminal to a universal server having access to further user identification and at least one user account from the

Art Unit: 3624

electronic commerce wherein the universal server retrieves the user identification from a database based on a dynamic identification interchange within the universal server.

The term "dynamic identification interchange" is interpreted to have the following meaning in light of the specification p. 38 lines 30- p. 39 line 8 recited as follows:

Processing in block 908 checks a routing table resident within the universal server. A routing table determines if a transaction "swap data step, append data step, convert data step, route data step; and/or process data step" is required. Said transaction swap data step, append data step, convert data step, route data step, and/or process data step processing is referred to as a (DII). The DII process accepts a first identification form/transaction form and substitutes the first form for a second form. For example, a hotel room key/card may be accepted as a first form of ID and in a DII processing step substituted for or appended to a second form of ID, a credit card. This process can allow a user to have goods and services billed to a credit card by being identified first with a hotel room key/card.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3624

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Morall, Katherine; Smart cards: Signal a cashless society, Bank Marketing v27n4 PP:13-17, Apr 1995. This article provides state of commerce base upon stored value cards. Morall described a general concept of money transfer into the stored value card using a reader/writer terminal.

Brachti et al, (EP 0137 999 A2) discloses a electronic funds transfer method based on a card connected to a retail (point-of-sale) terminal connected to a telecommunication system.
